Budesonide / Formoterol Inhaler

A combination inhaled corticosteroid and long-acting beta2-agonist for regular maintenance treatment of asthma and COPD.

What this product is used for

Regular maintenance treatment of asthma where a combination product is appropriate, and symptomatic COPD.

How to use it

Usually one to two inhalations twice daily, adjusted to the lowest effective dose. Rinse the mouth after use.

Important things to know

- Not for the relief of an acute asthma attack.
- Rinse mouth after use to reduce oral candidiasis.
- Review therapy if control deteriorates.

Storing this product

Store below 30 deg C with the mouthpiece cover in place. Do not freeze.

Questions or concerns

Talk to your doctor or pharmacist. To report a suspected side effect, contact Mynarix at safety@mynarix.com or +1 817 256 2824.
