PRESCRIBING INFORMATION

Budesonide / Formoterol Inhaler

Respiratory | Inhaler | Rx only

A combination inhaled corticosteroid and long-acting beta2-agonist for regular maintenance treatment of asthma and COPD.

1. Composition

Active ingredients: Budesonide 160 mcg / Formoterol 4.5 mcg

Strength: 160/4.5 per dose

Pack size: 120 actuations

ATC class: R03AK07

2. Indications

Regular maintenance treatment of asthma where a combination product is appropriate, and symptomatic COPD.

3. Dosage and Administration

Usually one to two inhalations twice daily, adjusted to the lowest effective dose. Rinse the mouth after use.

4. Mechanism of Action

Combines an anti-inflammatory corticosteroid with a long-acting bronchodilator for sustained airway control.

5. Warnings and Precautions

- Not for the relief of an acute asthma attack.
- Rinse mouth after use to reduce oral candidiasis.
- Review therapy if control deteriorates.

6. Storage

Store below 30 deg C with the mouthpiece cover in place. Do not freeze.

7. Manufacturer

Mynarix, 2400 Skyline Drive, Suite 120, Mesquite Industrial District, Dallas, TX 75149
