Ceftriaxone for Injection

A third-generation cephalosporin antibiotic for serious systemic bacterial infections.

What this product is used for

Treatment of serious infections including sepsis, meningitis, and lower respiratory and urinary infections.

How to use it

Dose and route per infection severity and body weight; reconstitute per labeling before administration.

Important things to know

- Contraindicated with calcium-containing IV solutions in neonates.
- Assess for cephalosporin and penicillin hypersensitivity.
- Monitor for signs of superinfection.

Storing this product

Store dry powder below 25 deg C, protected from light. Use reconstituted solution promptly.

Questions or concerns

Talk to your doctor or pharmacist. To report a suspected side effect, contact Mynarix at safety@mynarix.com or +1 817 256 2824.
