Salbutamol Inhalation Aerosol

A short-acting beta2-agonist bronchodilator for the relief and prevention of bronchospasm in asthma and reversible obstructive airway disease.

What this product is used for

Relief of bronchospasm in asthma, chronic bronchitis and emphysema, and prevention of exercise-induced bronchospasm.

How to use it

One to two inhalations as needed for acute symptoms; two inhalations 15 minutes before exercise for prevention. Do not exceed the maximum daily dose without medical advice.

Important things to know

- Increasing use may indicate worsening asthma requiring reassessment.
- Use with caution in cardiovascular disorders, hyperthyroidism or diabetes.
- May cause tremor, headache or transient tachycardia.

Storing this product

Store below 30 deg C. Protect from frost and sunlight. Pressurised container: do not pierce or burn.

Questions or concerns

Talk to your doctor or pharmacist. To report a suspected side effect, contact Mynarix at safety@mynarix.com or +1 817 256 2824.
