PRESCRIBING INFORMATION

Salbutamol Inhalation Aerosol

Respiratory | Inhaler | Rx only

A short-acting beta2-agonist bronchodilator for the relief and prevention of bronchospasm in asthma and reversible obstructive airway disease.

1. Composition

Active ingredient: Salbutamol 100 mcg / actuation

Strength: 100 mcg per dose

Pack size: 200 actuations

ATC class: R03AC02

2. Indications

Relief of bronchospasm in asthma, chronic bronchitis and emphysema, and prevention of exercise-induced bronchospasm.

3. Dosage and Administration

One to two inhalations as needed for acute symptoms; two inhalations 15 minutes before exercise for prevention. Do not exceed the maximum daily dose without medical advice.

4. Mechanism of Action

Stimulates beta2-adrenergic receptors in bronchial smooth muscle, producing rapid airway relaxation.

5. Warnings and Precautions

- Increasing use may indicate worsening asthma requiring reassessment.
- Use with caution in cardiovascular disorders, hyperthyroidism or diabetes.
- May cause tremor, headache or transient tachycardia.

6. Storage

Store below 30 deg C. Protect from frost and sunlight. Pressurised container: do not pierce or burn.

7. Manufacturer

Mynarix, 2400 Skyline Drive, Suite 120, Mesquite Industrial District, Dallas, TX 75149
