Tamsulosin Capsules

A selective alpha-blocker for the symptomatic treatment of benign prostatic hyperplasia.

What this product is used for

Treatment of lower urinary tract symptoms associated with benign prostatic hyperplasia.

How to use it

One 0.4 mg capsule once daily after the same meal each day; swallow whole.

Important things to know

- May cause orthostatic hypotension, particularly at initiation.
- Inform ophthalmologist before cataract surgery.
- Use with caution with other alpha-blockers.

Storing this product

Store below 30 deg C, protected from moisture.

Questions or concerns
