

Patient Information Leaflet

Mynarix | Please read carefully before use

Tenofovir / Lamivudine / Dolutegravir

A once-daily fixed-dose combination antiretroviral therapy for the treatment of HIV-1 infection.

What this product is used for

Treatment of HIV-1 infection as a complete regimen in adults and adolescents at least 25 kg.

How to use it

One tablet once daily with or without food. Adherence is essential to maintain viral suppression.

Important things to know

- Test for hepatitis B before starting; discontinuation may cause HBV flare.
- Monitor renal function; adjust in renal impairment.
- Review interacting co-medications.

Storing this product

Store below 30 deg C; keep tightly closed to protect from moisture.

Questions or concerns

Talk to your doctor or pharmacist. To report a suspected side effect, contact Mynarix at safety@mynarix.com or +1 817 256 2824.
